

HTC - the Innovators, not the imitators!

HTC Twister™ HTC Superfloor™ guide

Material:

Diamond polished concrete. Normal and hard top concrete types can be treated according to the HTC Superfloor™ method.

Characteristics:

- High gloss finish with exposed aggregate
- Easy to clean
- Easy to maintain

Availability:

For industrial, public and retail premises.

TWISTER on HTC Superfloor™:

The Twister™ system is the only approved and working maintenance method for HTC Superfloor™ – polished concrete. The system will maintain cleanliness and gloss over time. Twister™ Extreme (high speed burnisher with Twister™ Green) can be used to buff up the shine.

NOTE! We recommend using an auto-scrubber with vac.

Let the floor dry up if performing more than one cleaning pass over the surface.

Description/how to recognize

- Diamond polished concrete
- Often removed concrete top and exposed aggregate
- High gloss finish

Attributes/softness

Very hard

How to use TWISTER

Daily maintenance with green Twister on auto scrubber.
Dry buffing with green Twister.

Expected result/tips and tricks
