

HTC - the Innovators, not the imitators!

HTC Superprep™ box Tools for all coarse grinding

HTC Superprep-box simplifies handling of your HTC tools.

The box includes the five diamond segments you need to be able to coarsely grind hard and soft concrete or to remove old floor coatings like putty, glue, epoxy or linoleum floors.

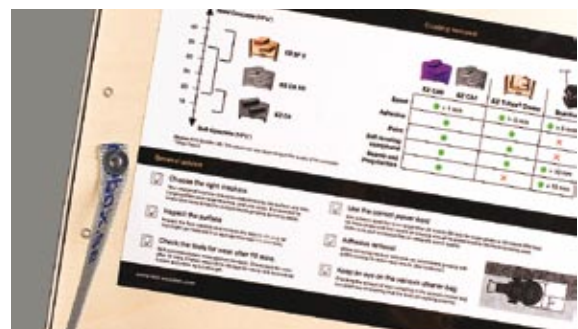

In the box you also find the accessories needed for grinding. The box is perfect for rental businesses as it simplifies the measuring of tool usage.

- Simplifies stock control of tools
- Sealed boards for simple measuring of tool usage
- Renting customer selects by themselves which tool works the best
- Have information for choice of tools and grinding
- The same box for all HTC machines
- Opportunity for additional sales of other accessories

Simple information - correct tool choice

The inside of the lid has basic information to help when choosing tools, and a few simple advice of how to drive the machine. More information can be obtained in the brochure "Quick guide to floor grinding".

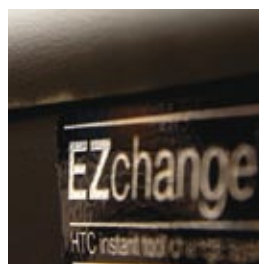

HTC Superprep™ box Guide

Name	Item no.	Description
HTC Superprep box	211872	Content: EZ SF2 - 9pcs, EZ CA0 - 9pcs, EZ CA1® - 9pcs, EZ C3 - 9pcs, EZ T-Rex® A Protect segment - 9pcs, hammer, gloves, breathing mask , splash guard, instruction sticker.

Instructions and help
The inside of the lid has basic information to help when choosing the correct tools. If the customer still runs into problems they have the folder "Quick guide to floor grinding" for more thorough help.

Fits all HTC grinding machines
The tools fit all HTC grinding machines regardless of size. For older HTC 420 it's however necessary to change tool holder and grinding cover.

Sealing for simple measuring
To simplify measuring of tool usage for rental businesses the tool boards can be sealed. That means measuring only is necessary on tools where the sealing has been broken. Extra sealing is included in the box.

Stock control
The box works like a miniature stock for the tools where you also can see when it's time to order a new set of tools.

Customer benefit
For you as a rental customer it is almost impossible to know which tools works under the circumstances your customer will have when grinding. With the box, the customers themselves can change to the tools that works the best directly at the workplace.

Additional sales
In the box it's possible to add peripheral equipment that the renting customer might need, like breathing mask, earplugs, gloves, rubber hammer etc. You're welcome to place a price list on the inside of the lid.
