

HTC

The MR Series

Extended with new tool

HTC extends the MR-series with a step for more coarse grinding.

HTC extends the new generation of resin tools with a step for more coarse grinding which have throughout across-the-board improvements. Better cutting capacity and longer life increase the efficiency and financial flow. The MR tools replace the first steps in the SR Series (Super Resin).

- The most sophisticated resin tool on the market
- 30% better cutting capacity
- Facilitates the grinding process
- Unique performance

MR = Mixed resin

The tool incorporates two kinds of resin, giving it an optimal combination and balance. Its unique composition makes this the most effective tool on the market.

HTC proves, once again, that we never stop perfecting our innovations!

The MR Series Guide

The MR Series supersedes the first two steps in the SR Series.

The MR Series

Name	Item no.	Description
EZ MR 4 Brown	211966	Suitable for coarse grinding of all types of concrete and natural stone. An efficiency-enhancing tool with high removal capacity.

EZ MR 5 Black	211690	Suitable for all kinds of concrete and natural stone. An efficiency-enhancing tool with high removal capacity.
----------------------	--------	--

EZ MR 6 Blue	211691	Suitable for all kinds of concrete and natural stone. An efficiency-enhancing tool with high removal capacity.
---------------------	--------	--

The SR Series

Name	Item no.	Description
EZ SR 30 Red	211489	Suitable for soft, abrasive concrete.

EZ SR 40 White	211490	Suitable for soft, abrasive concrete.
-----------------------	--------	---------------------------------------

EZ SR 50 Yellow	211538	Suitable for soft, abrasive concrete.
------------------------	--------	---------------------------------------

Recommended resin tools for other floors
