

HTC - the Innovators, not the imitators!

# HTC

## SR Series

### New Super Resin tools

### A huge step towards the ultimate grinding tool.

HTC is launching a new series of tools that are a further development of the Super Resin series. The tools are made from a completely new formula and include other innovations which will make a huge difference for the grinding capacity. The main benefit of these tools is the extended life. They also leave a more uniform scratch pattern compared to other tools which speeds up the grinding process. The tools are available in two versions, SB (Small Block) and BB (Big Block).

- Includes the latest grinding tool technology
- Up to 30% extended life compared to similar tools on the market
- High cutting rate
- More uniform scratch pattern
- Speeds up the grinding process

#### SB / BB - What's the difference?

The difference between SB (Small Block) and BB (Big Block) is the segment height. To see the difference between the tools during the grinding process, the corners are made rounded on the SB segments.

**EZ SB**  
Segment height:  
8 mm

**EZ BB**  
Segment height:  
12 mm

# SR Series Guide

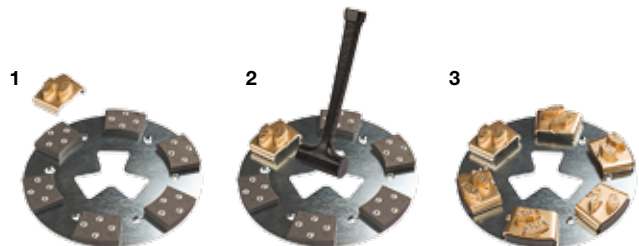

**EZ BB & SB - When the highest efficiency and life is desired.**

<b>EZ SB</b>	<b>EZ BB</b>	<b>Name</b>	<b>Art no.</b>	<b>Description</b>
