

PRESS RELEASE - Söderköping, 4 February 2015

New version of popular dust extractor for floor grinders

A close partnership between HTC and users of the HTC 80 iD dust extractor has resulted in a second generation of the machine with eight enhanced capabilities.

The biggest improvement to the HTC 80 iD II is its brand new, innovative duck bill valve made of a rubber material. The valve increases the efficiency of dust removal from the cyclones and protects the Longopac® bag from possible damage by conventional hatches.

Other enhancements include:

- Ergonomic slide function on filter cleaning valve and bypass valve
- 30% more space for dust in the pre-separator
- Welded filter seams prevent dust leakage
- Power plugs moved for simpler operation

The HTC 80 iD II increases the performance of floor grinders by as much as 15% compared to conventional dust extractors.

About HTC Sweden AB

Established in 1987, HTC Sweden AB is a rapidly expanding technology company that manufactures and develops products for the processing of various kinds of surfaces. A patented grinding system for floors was launched in 1992 and HTC is currently an international market leader within floor grinding systems based on diamond technology with several patented technology solutions in the market. As well as developing unique floor solutions, HTC has created polished concrete under the brand name HTC Superfloor™ and the unique diamond-based

cleaning and maintenance system Twister™. The company's head office, product development and production units are located in Söderköping. It has subsidiaries in the USA, Germany, the UK and France. HTC Sweden has been owned by Copenhagen-based Danish-Swedish Polaris Equity since June 2013. Polaris Private Equity is a risk capital company that focuses on buyout investments in well-established, small and medium sized companies in Denmark and Sweden. The focus is on investments in companies with good potential for development and SEK 250-2000 million in turnover. Polaris has invested in 28 businesses to date, 14 of which have been sold at a good profit. It has also made more than 50 follow-on investments for its portfolio companies.
