

HTC

New grinding holders

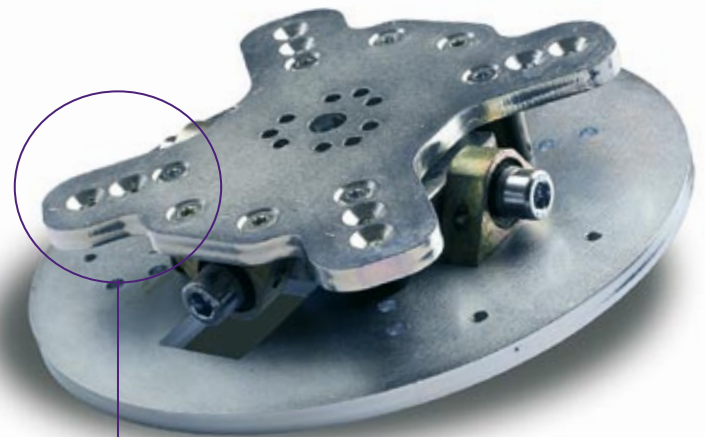

Robust and flexible

Increase the life of your machines and tools.

HTC has developed a new grinding holder that will improve your grinding and reduce the need for servicing of your machine. Adjustable to different types of grinding and polishing, and more flexibility makes it universally applicable.

- More robust and safer
- Adjustable to different needs
- Can withstand tough grinding
- More even speed to reduce tool wear
- Better cooling of the holder and segment
- Much longer operating time
- Fits all hub machines

Adjustable to different positions with a total of four different hardness settings.

HTC's unique and innovative grinding holders!

Robust and flexible disc holders that are adjustable to your needs. Increase the life of your diamond segments.

Yet more proof that HTC never ceases to drive development forward in grinder technology!

New grinding holders

Guide

Grinding holder for all machines equipped with hubs.

Name	Prod.no.	Description
Grinding holder, Kardan complete 160	112355	Fits: HTC 420 Not adjustable. The machine is too lightweight for different settings to provide any benefit.
