

HTC Ravager™ Bush Hammering Tool

Create a bush hammered surface, expose large aggregate or remove tough coatings.

The HTC Ravager™ creates a bush hammered profile perfect for high traction exterior surfaces. It has an extremely high stock removal capacity and can remove rigid or brittle coatings up to 10 mm in thickness. You can also use these tools to repair a failing cap on concrete or a slab that has been exposed to rain.

HTC Ravager™ tools can also achieve a standard surface preparation profile equivalent to International Concrete Repair Institute's (I.C.R.I.) Concrete Surface Profile (C.S.P.) standard of 6-7 using your HTC grinder.

Profile of concrete after one pass with the HTC Ravager™

The remnants of a 10 mm overlay after three passes with the HTC Ravager™

NEW!

✓ Further developed with more pins per roll (48 pins vs 30 pins in the earlier version). This gives improved wear resistance and a more homogenous surface as a result.

✓ Leaves a bush hammered profile perfect for high traction exterior surfaces

✓ Exposes large aggregates in as little as one pass

✓ Removes rigid or brittle coatings and overlays with ease

✓ Stock removal to level concrete

✓ Repair a failing cap on concrete or a slab that has been exposed to rain

✓ Replacable parts makes rebuilds easier and less costly

✓ Available for all HTC machines* and hand grinders

* Except HTC 270 EG, HTC 280, HTC 400

HTC Ravager™

Name	Item no.	Description
Ravager™ 270 mm Tool Complete	593 34 42-06	Includes (3) Ravager rollers assembled and mounted to plate. Recommended with HTC 950, DURATIQ 8 and HTC 800 series.
Ravager™ 270 mm Tool Complete	593 34 42-07	Includes (6) Ravager rollers assembled and mounted to plate. Recommended for use with HTC 950, DURATIQ 8 and HTC 800 series.
Ravager™ 230 mm Tool Complete	593 34 42-05	Includes (3) Ravager rollers assembled and mounted to plate. Recommended for use with DURATIQ 6, HTC 650 series, DURATIQ 5, HTC 500 series and the HTC 510.
Ravager™ 180 mm Tool Complete	593 34 42-02	Includes (3) Ravager rollers assembled and mounted to plate. Recommended for use with HTC 450.
Ravager™ 150 mm 1700 rpm, Tool Complete	593 34 42-01	Includes (3) Ravager rollers assembled and mounted to plate. Recommended for hand grinding machines, 1700 rpm. Attaches via 14 mm arbor.

Prolong the life of your HTC Ravager™!

Rebuild your HTC Ravager™ by purchasing the individual parts needed to make the tool complete. View the diagram below for more details. The HTC Ravager™ 270 mm and 230 mm plates share the same mounting blocks and rollers and the 180 mm and 150 mm hand grinding tool share the same style.

Tool plate 270 mm

Item no. 593 31 35-02

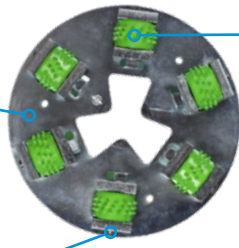

Tool plate 230 mm

Item no. 593 31 35-03

Tool plate 180 mm

Item no. 593 31 35-01

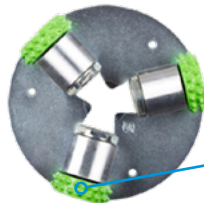

Pre-drilled holes for easy and precise mounting.

Fixation kit for 270 mm and 230 mm

Item no. 595 01 81-02

Includes both mounting blocks, axel and mounting bolts.

Roll for 270 mm and 230 mm

Item no. 594 04 18-02

Bearings are pre-pressed. 270 mm tool has (3/6) rollers, 230 mm tool has (3) rollers

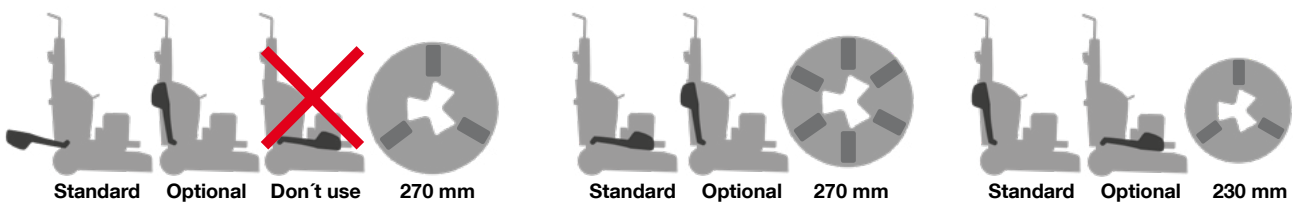

Roll & block for 180 mm and 150 mm

Item no 595 67 02-01

Bearings are pre-pressed. 180 mm tool and 150 mm Hand Grinding tool have (3) rollers.

Use of weights

“Standard” gives normal removal rate. “Optional” results in a higher grinding pressure and removal rate but with a risk for a higher wear
