

# HTC XX Series

When nothing else makes the cut!

The new XX series consists of unique diamond tools for the hardest concrete and where speed is essential. Problem-solvers for when nothing else makes the cut.

The new XX tools from HTC have been especially developed for grinding extremely hard concrete when the X-series isn't up to the task. They are truly high performance tools.

Softer segment bond means increased diamond exposure to surfaces – and those tough jobs going faster.

### SHMX – from soft to extremely hard concrete

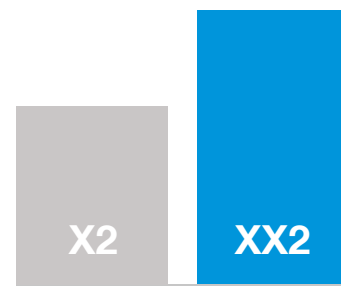

HTC's series of metal-bond diamond tools for grinding concrete have been given a thorough update. It now consists of five series of tools, covering all types of concrete grades, and makes your tool choice easier when grinding concrete floors.

SOFT CONCRETE	MEDIUM CONCRETE	HARD CONCRETE	XTREMELY HARD CONCRETE

All EZchange™ metal tools are from March 2020 sold in 3-pack boxes.

**54% higher effect\***

\* Refers to productivity tests with tools on an HTC DURATIQ RX8 equipped with the Mist Cooler System and AirFlow™ tool holder. The tests showed 54% higher effect compared to corresponding grinding with the X-series.
