Ameripolish Concrete Dyes

Now put color in your
HTC Superfloor™!

- EnhancerPro™ Series - Penetrating Agent was created to improve the dye penetration in tightly troweled and polished concrete as well as during hot weather applications. By using the Penetrating Agent, you are able to control the “drive” of the dye into the concrete, minimizing both surface residues and material waste.
- EdgeTint is a mixture of AmeriPolish dye and a proprietary acrylic blend that complements the field color for use on areas like edges or places that can't be polished.
- AmeriPolish dyes are shipped in powder form to avoid hazmat shipments. Customer supplies acetone.
- AmeriPolish developed Patriot concrete dye applicators that utilize the SpraySafe™ technology.
