

EZgrind™

For grinding & polishing edges

The EZgrind series is a resin bond diamond tool with velcro back for handheld machines, made of the same resin used in our EZ SR tools. The EZgrind series is therefore a perfect complement to the SR tools and a given choice in our HTC Superfloor™ process. The EZgrind series contains tools in different grit sizes ranging from surface leveling and rough grinding down to the initial steps of polishing. For a high gloss and perfect finish, and especially if you are following our HTC Superfloor™ concept, we recommend you to then switch to our FENIX tools for the remaining yellow and green polishing step.

EZgrind 130 Grey - 40 grit

Item Number: 593343506

The EZgrind Grey 40 is a resin bond diamond tool with velcro back for handheld machines. The tool can be used for grinding of all types of concrete. It can also be used on terrazzo, cementitious toppings and natural stone floors. The tool is made of the same resin used in our SR series and is therefore a perfect complement to the SR tools and a given choice in our HTC Superfloor™ process.
