

S Series

- For soft concrete

S Series for soft concrete and abrasive surfaces. Soft concrete, asphalt or other porous materials are often very abrasive and tools risk being worn out pretty quickly if not chosen wisely. HTC's tools in the S Series are specifically designed for these types of material. (By soft concrete we mean concrete with Mohs scratch test between 2 and 3)

EZ S2 Gold (DS) - 25 grit

- Item Number: 593328901

S2 is specifically developed for grinding of soft concrete and abrasive surfaces. Soft concrete, asphalt or other porous materials are often very abrasive and tools risk being worn out pretty quickly if not chosen wisely. By soft concrete we mean concrete between 2 and 3 with Mohs scratch test.

EZ S3 Grey (DS) - 40 grit

- Item Number: 593329001

S3 is specifically developed for grinding of soft concrete and abrasive surfaces. Soft concrete, asphalt or other porous materials are often very abrasive and tools risk being worn out pretty quickly if not chosen wisely. By soft concrete we mean concrete between 2 and 3 with Mohs scratch test.
