

SUPERPREP Series

- Tools tougher than any job.

Good results require good preparation. This is especially important when working with concrete floors. Some jobs are more demanding than others and a floor grinding pro knows what will make the difference. We do too.

HTC has focused on developing the latest line of diamond tools expressly for floor prep. Whether it's a matter of such demanding work as removing old paint or levelling compound so that it can be replaced with a new coating, or levelling a concrete surface prior to grinding and polishing, the choice of tools is crucial for achieving the best final results.

The HTC Superprep™ series of tools has all capabilities you need to deliver profitable results and finish the job on time. The series combines the entirely new EZ PREP series, along with the well-known T-Rex® and Ravager tools, both of which have been further developed and improved. All gathered and packaged under the name HTC Superprep™ – the absolute toughest tooling series from HTC.

HTC SUPERPREP™ SERIES

THE TOUGHEST.
